It offers a comprehensive view of the continent's storage infrastructure--from pumped hydro and battery systems to emerging technologies like hydrogen and thermal storage.

This publicly accessible tool allows users to explore projects by technology type, location, scale, and status--offering deep insights into how storage supports the EU's energy transition.

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the ...

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. ...

Because of water resources availability and tailored energy policies, Germany, Italy, and Spain accounted for the largest pumped hydro storage capacity in the region, ...

Continued growth is expected in FoM and C& I storage areas. By 2030, increased FoM deployment, declining EUR/MWh storage costs, and policy advancements such as the ...

At TLS, we don't just build containers -- we engineer functional enclosures tailor-made for energy systems. From the freezing grids of ...

It offers near real-time data on the deployment of storage facilities across Europe, including an interactive dashboard and map, and ...

Note: Europe - East includes Czech Republic, Hungary, Poland, Slovakia, Slovenia, Ukraine. Europe - South

includes Bulgaria, Croatia, Cyprus, Greece, Malta, Romania.

Key findings highlight the growing expectations of lithium ion battery storage, the continued importance of pumped-storage hydropower and the significant potential of energy storage to ...

At TLS, we don't just build containers -- we engineer functional enclosures tailor-made for energy systems. From the freezing grids of Northern Europe to the sun-scorched ...

It offers near real-time data on the deployment of storage facilities across Europe, including an interactive dashboard and map, and identifies all the technologies, from battery ...
