What is a drone docking station?

They are typically designed for battery-powered multirotor and eVTOL drones, as pure fixed-wing platforms require runway space to land. Some drone docking stations also provide an enclosure that stores the drone and protects it from rain, theft and damage. These enclosures may also be used to store packages for delivery drone services.

Does Riga have 5G?

The port used to rely on WiFi and 4G to connect ships and drones to the mainland, but in 2020, it teamed up with LMT, a Latvian telecoms company, to roll out 5G connections across the port. Ansis Zeltins is the CEO of the Freeport of Riga Authority and the chairman of the European Sea Ports Organization. Courtesy of the Freeport of Riga

Does Freeport of Riga have 5G?

Freeport of Riga began rolling out its 5G network in 2020 and is now expanding it from the port to the sea. Courtesy of the Freeport of Riga The real challenge was connecting the ships in transit. They used a "multi-hop" method, where ships serve as floating telecom base stations.

How can zeltins bring new technology to the Freeport of Riga?

Looking ahead, Zeltins wants to harness the faster connection to bring new technology to the Freeport of Riga. For instance, the port is testing a Remote Operations Center platform for autonomous maritime systems.

LVR Flote, a port services provider based in Riga, first successfully tested the method in November 2023 using LIVA, the first 5G-equipped ship on the Baltic Sea.

Drone docking stations and drone ports allow UAVs (unmanned aerial vehicles) to take off and land, and also provide a recharging capability for the aircraft. They are typically ...

In this article, we highlight the salient features of some of the best turnkey DJI-compatible docking stations in the market that you can leverage based on your geography, ...
