SeaFold's unique 5:1 design creates 80% more storage and operating efficiencies at terminals, railheads, and ports. Reduces container lifts and container movements on ships, trucks, rail, ...

We design foldable intermodal shipping containers that exceed ISO and CSC standards, and the systems needed to fold them standing upright in bundles, safely and quickly.

Despite these disadvantages, foldable containers are a transport solution of the future. They not only save space, time, and money but also lower your carbon footprint.

We use the model to minimize total transportation costs, inventory holding, handling, folding and unfolding, container leasing, and installing facilities that accommodate ...

COLLAPSECON is the collapsible shipping container pioneering the future of global trade. It's practical and rigid design saves on space, cost and handling, and helps to significantly reduce ...

Currently, the most commonly used container sizes are the TEU and the FEU (Forty-foot Equivalent Units). These containers are available as general or temperature ...

Some collapsible containers require massive infrastructure and space to expand and collapse, while others are inefficiently expanded and collapsed using forklifts and ...

World's first ISO-certified five-in-one shipping container set to improve the transportation and logistics industries' efficiency and sustainability.

A five-in-one foldable container design could boost efficiency and transform the carriages of empties, claims
