I went for a spin in the Aptera Solar EV, a solar-powered car that gets up to 40 miles of free range every day, at CES 2025

A futuristic solar-powered vehicle made by a startup called Aptera just took a long road trip, powered by the sun. And one of Aptera's executives was at the wheel.

Aptera, a San Diego-based start-up, just completed its first solar-supported road trip with its futuristic car, cruising over 300 miles on a single charge from Arizona to California.

With only three wheels and a sleek teardrop shape, it slices through the air with less drag, reducing energy consumption. In terms of ...

This futuristic car with integrated solar panels, world's first production-ready solar-powered electric vehicle, promises up to 60 kms of ...

Aptera Motors has just successfully completed its first low-speed function test of its fully solar-powered electric vehicle.

Aptera, a San Diego-based start-up, just completed its first solar-supported road trip with its futuristic car, cruising over 300 miles on ...

Aptera is unlike any other vehicle being manufactured today. Superbly engineered with energy efficiency first and foremost, it's the first electric vehicle to make solar mobility practicle.
