What arc flash mitigation solutions do you offer?

We offer a variety of arc flash mitigation solutions, such as switchgear, software, and circuit breakers, for both passive and active arc flash protection. Our systems comply with the National Fire Protection Association (NFPA) 70E: standard for electrical safety in the workplace. Need help?

What is an arc flash?

An arc flash is an electrical accident that creates a high-temperature explosion. It can vaporize surrounding metal, set fires, and result in severe burns. Although rare, arc flashes can have grave consequences so you need to ensure your people and site are always protected.

How many arc flash assessments have been delivered?

More than 3,000 assessments have been delivered with consistent expertise, tools, and deliverables to our customers all over the world. The type of equipment specified, and where in an electrical system it's installed, can significantly reduce the duration and threat of an arc flash incident.

What causes an arc flash?

An arc flash can happen during abnormal use due to a corruption of isolation, or in circumstances involving animals, flooding, vibrations, or corrosion. Yet, it can also occur during commissioning or maintenance, rendering equipment unusable and forcing costly downtime with serious economic consequences.

Who is a reputable switchgear manufacturer in China? DOHO is one of the most reputable switchgear manufacturers in China, with over 10 years in the electrical industry.

All Sell-Best arc protection relays can use fiber optic sensors to detect arc flashes or arc faults within milliseconds. Their compatibility with various communication protocols and interfaces ...

With a fast relay output speed up to 5ms, AFR-4 can minimize or completely eliminate arc flash damage, improving system safety and reliability. It can be used in various arc protection ...
