Technical experts conducting detailed hardware inspections, or "teardowns," of inverters connected to U.S. power grids revealed the presence of unauthorized communication ...

U.S. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after discovering undocumented 4G/LTE modules and other ...

These rogue devices, found in solar inverters and batteries, could pose significant threats by enabling unauthorized remote access, potentially destabilizing power grids and ...

Recent investigations have uncovered the presence of undocumented communication devices within Chinese-manufactured solar power inverters and batteries, ...

Hidden wireless devices in solar inverters and batteries create security risks. Learn how Bastille detects covert threats to energy infrastructure.

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar ...

Recent investigative reports have uncovered concerns in the renewable energy sector: rogue communication devices found embedded within solar power inverters and ...

Over the past nine months, U.S. experts have identified these undocumented devices in solar power inverters and batteries from multiple Chinese suppliers during detailed ...

U.S. experts have allegedly found rogue communication devices, including cellular radios, in Chinese-made
