-----  
Is Austria poised for a significant transformation in solar energy?

Austria's solar energy sector is poised for a significant transformation as the government updates its subsidy guidelines to incentivize more power purchase agreements (PPAs) for solar photovoltaic (PV) projects.

Why is Austria allowing PV systems with PPAs to receive subsidies?

By enabling PV systems with PPAs to receive additional subsidies, the Austrian government is facilitating easier access to financing for developers of new projects. The revised guidelines are part of Austria's broader strategy to transition to a low-carbon economy and achieve its renewable energy targets.

Does Europe have a technological edge in inverters & battery storage?

The ministry highlighted Europe's technological edge in inverters--critical for grid integration of PV systems--and battery storage, noting these sectors "align with Austria's strategic priorities to strengthen domestic supply chains and reduce reliance on third-country imports."

Does Austria have a power shortage?

Curtailed power is a significant problem in Austria, with independent transmission system operator Austrian Power Grid reporting that the country curtailed 57.4GWh of electricity in 2024, and that in the first 29 days of 2025 alone, a further 4.8GWh of power was curtailed.

PVTIME - PV Austria has released a key study providing a systematic assessment of the storage capacity required by its power ...

The Fronius Reserva energy storage system is one of several innovations presented at Intersolar Europe in Munich, bringing the Austrian family-owned company closer ...

The Austrian Ministry of Economic Affairs and Energy has announced a "Made in Europe" bonus of 20% to government funding for PV and energy storage projects that use ...

required by its power system to maintain progress in the energy transition.

Effective from June 23, 2025, a "Made in Europe" bonus of 20% will be applied to government funding for photovoltaic (PV) and energy storage projects utilizing components ...

The Austrian Ministry of Economic Affairs and Energy has announced a "Made in Europe" bonus of 20% to government funding for ...

Austria's Ministry of Economic Affairs, Energy and Tourism has opened the third and final call for photovoltaic and energy storage rebates, with EUR8 million in available funds.

Previously, under the Renewable Energy Expansion Act (EAG), PV systems over 1 MW had to choose between feed-in tariffs and PPAs--they could not have both. The ...

Although demand for photovoltaic systems has increased enormously due to the recent increases of energy prices, the path to achieve a production of an additional 11 TWh until 2030 is still ...

Previously, under the Renewable Energy Expansion Act (EAG), PV systems over 1 MW had to choose between feed-in tariffs and ...

Public Funding Opportunities for Flow Batteries Currently, two open funding calls by the Austrian Research Promotion Agency FFG:

Austria plans to introduce a "Made in Europe" bonus for solar and electricity storage projects but to limit renewables funding in 2025 to the legally possible minimum, the ...
