The ISSFOR system may be regarded as predictive decision making system for oil refineries management and planning activities, in order to analyze and investigate certain technical and...

From voice recognition to machine learning, ExxonMobil's chemical and refining plants are installing a number of "smart technology upgrades" targeted at reducing emissions and ...

From voice recognition to machine learning, ExxonMobil's chemical and refining plants are installing a number of "smart technology upgrades" ...

Innovative materials, strategies, and technologies are highlighted. Finally, the future directions are envisioned. We hope this review will advance the development of mobile ...

This model aims to minimise the costs of the renewable energy system while considering its ability to accommodate the varying energy demands across the time periods. ...

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from ...

Whether you need a small 1,200 BPD refinery for a remote site or a 10,000 BPD system to support military operations, Corban Energy Group can engineer a tailored, scalable solution ...

SCU provides 500kwh to 2mwh energy storage container solutions. Power up your business with reliable energy solutions. Say goodbye to high energy costs and hello to smarter solutions with ...

This paper delves into the business use cases of using mobile ESS and provides benchmark examples, both for utility and non-utility sectors, to illustrate the application of ...

On-site renewables, like battery storage and solar-plus-storage, can play a strategic role in mitigating the impact of rising energy costs and hedging against future price ...

While previous research has optimized the locations of mobile energy storage (MES) devices, the critical aspect of MES capacity sizing has been largely neglected, despite ...
