We have developed various types of battery liquid cooling plates to optimize cooling efficiency. Each type is specifically designed for different battery types.

Sogefi offers a full range of innovative battery cold plate solutions to meet the diverse needs of EV battery pack architectures. Laser welded extruded designs, and laser welded cold plates are ...

RNBC is a leading cooling plate manufacturer that provides top-quality products and research and development services for thermal management. Our vision is to make constant temperatures ...

It is expected that there will be an increasing demand for the cooling plates due to the demand for improved battery technology and energy density by top electric vehicle battery ...

Valeo designs and manufactures compact and cost competitive battery cooling solutions (refrigerant, liquid and air cooling) to cater for all types of powertrains: hybrids in ...

ToneCooling designs and manufactures custom battery cold plates for EV battery packs, commercial vehicles, stationary storage and backup power systems. We support ...

Efficient battery cooling solutions with customised cold plates for EVs, electric car battery boxes, and battery packs, designed for optimal thermal management

Guchen's battery direct cooling plate offers a high-performance, scalable, and cost-effective solution for the demanding thermal management needs of modern electric cars.

Need reliable battery cooling plates? Discover certified manufacturers for electric vehicles and energy storage.
