---

Punakha--After months of delays caused by incessant rain and prolonged monsoon, Phase II of Bhutan's first utility-scale solar power plant in Yongtru, Sephu Gewog, is ...

In this paper, efforts have been made to assess the future energy potential from the rooftop solar photovoltaic (PV) systems in Thimphu City. For this study, we designed and ...

Solar energy offers a promising solution, and Bhutan has set ambitious targets: 500 MW by 2025 and 1,000 MW by 2030. In line with these goals, a 22.38 MW solar farm is ...

The Department of Energy, MoENR announces the commissioning of Phase I (17.38 MWp) of the Sephu Solar Project in ...

This project will be Bhutan's first and largest grid-connected utility-scale solar power plant, marking a significant leap in the country's renewable energy ...

This project will be Bhutan's first and largest grid-connected utility-scale solar power plant, marking a significant leap in the country's renewable energy ambitions. Beyond Jamjee, ...

Developed by the Bhutan Energy Research and Development Center (BERDC) with support from the International Solar Alliance (ISA), the roadmap focuses on deploying ...

With abundant sunshine and international support, Bhutan's solar roadmap signals a transformative shift in the country's energy landscape, positioning it as a model for ...

The Department of Energy, MoENR announces the commissioning of Phase I (17.38 MWp) of the Sephu Solar Project in Sephu Gewog, Wangdue Phodrang, marking the ...

Scheduled for completion within 24 months, the solar power project is expected to be operational by May 2027. It will play a crucial role in expanding Bhutan"s solar energy ...

Bhutan offers a unique opportunity for high-impact solar development, particularly in remote mountain communities and as a support system to its hydropower base.

Developed by the Bhutan Energy Research and Development Center (BERDC) with support from the International Solar Alliance (ISA), ...
