How do I control my solar lights?

These lights can be controlled by PIR sensor, remote control, timer or switch. We offer free consultations to assess the needs of all of our customers and ensure that you choose the perfect solar lighting solution for your needs.

Do solar lights have a remote control?

**Safety and Security:** Use the remote control to activate security features that may be available on your solar lights, such as motion sensors or sudden brightness adjustments. This can deter unwanted visitors and add an extra layer of security to your home environment.

What are the benefits of using a solar light remote control?

**Versatility:** Many remote controls come with the ability to control multiple lights at once, making it easier to manage and customize your solar lighting system as a whole. These are just some of the benefits of using a solar light remote control. Now, let's dive into how to use one.

How do solar lights help keep your home safe?

Solar lights help keep your home safe by illuminating every space outside the house. This keeps burglars away even when nobody is home. Additionally, some outdoor solar lights are built with motion sensors, and light up or brighten up when they detect movement, which is a vital feature for home security.
