Designed to tackle the intermittency of wind and solar power, this pumped hydro initiative could store enough electricity to power 200,000 homes for 8 hours--equivalent to keeping Sydney ...

It is expected to be operational in 2026 and will be able to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods.

The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. Enough energy to power one-third of ...

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar energy usage, stabilize grid ...

It is expected to be operational in 2026 and will be able to store enough renewable energy to power one-third of Canberra for two ...

As Australia accelerates its renewable energy transition, the Canberra 2024 Energy Storage Power Station Tender represents a pivotal moment for global energy storage providers. This ...

In partnership with Eku Energy, construction is underway on concrete bases for the batteries and the main switching building at Williamsdale. The large-scale battery energy ...

The large-scale 250 megawatts (MW) battery will store enough renewable energy to power one-third of the city of Canberra for two hours during peak demand, helping to ...

The plant will have a solar photovoltaic capacity of 125 MW and a battery-based power storage system of up

to 55MW/220 MWh. The company acquired the project from Sun ...

The large-scale 250megawatts (MW) battery will store enough renewable energy to power one-third of Canberra for two hours during peak demand, providing long-term energy ...

The plant will have a solar photovoltaic capacity of 125 MW and a battery-based power storage system of up to 55MW/220 MWh. The ...

Ekus Energy has finalized financing for its 250 MW/500 MWh energy storage system in Canberra, contributing to the energy security of the ACT and its ambitious climate goals.
