The 120KW DC charging pile dual port is suitable for large vehicles with a power of 90-180 degrees Celsius (mainly referring to mud trucks, buses and logistics vehicles).

As one of the most professional EV electric vehicle charging points manufacturers in China, we're featured by quality products and customized service.

120KW Integrated dual-port DC Charging Pile The company takes new energy electric vehicle charging equipment and facilities as its leading products.

Intelligent, efficient, stable and reliable charging. All models are compatible with IP55 high protection level. Dual-gun simultaneous charging design. Intelligent speed regulation.

Floor-standing DC charging piles are mainly used for DC fast charging of electric vehicles. It is a charging pile that integrates the functions of charging control and guidance, human-computer ...

Introducing our Custom 120kw DC Charging Pile, engineered for efficiency and reliability in powering electric vehicles. This charging station is designed to meet the demanding needs of ...

Product 120KW vertical DC charging pile Products Categories Mobile prefabricated cabin YZC Prefabricated warehouses YB-12/0.4High and low voltage prefabricated substation (European ...

With the concept of modular design, it can be flexibly configured into 60kW, 80kW, 100kW and 120kW and other power outputs to meet the requirements of charging EVs with ...
