-----  
Are undocumented communication devices in Chinese solar inverters a risk?

Following the discovery of unknown communication devices in Chinese solar inverters, US energy authorities want to reassess their risk. During the investigation of inverters from China by experts in the USA, undocumented communication devices were found in some devices.

Are Chinese power inverters being used on solar panels?

U.S. officials have discovered undisclosed communication devices on Chinese-made power inverters that were being used on solar panels, Reuters reported today based on anonymous sources within the federal government. The inverters are devices separate from power sources like solar arrays or batteries.

Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.

In a shocking revelation that has sent ripples through the cybersecurity and renewable energy communities, security experts have discovered undocumented ...

U.S. energy officials are investigating hidden communication devices found in Chinese-made solar power equipment. According to a ...

Chileans (Spanish: Chilenos, pronounced [tʃi'lenos]) are an ethnic group and nation native to the country of Chile and its neighboring insular territories. Most Chileans share a common culture, ...
