What is the 5G Observatory?

The Observatory tracks a wide range of data on 5G deployments since 2018, including use of 5G standalone for verticals and radio spectrum assignments. It covers the 27 EU Member States and 20 additional non-EU countries, offering a comprehensive view of 5G developments across Europe and beyond. Download the 2025 5G Observatory report

What are European auctions of the C-band for 5G?

Table 2. European auctions of the C-band for 5G: amount of spectrum auctioned and spectrum packaging. An interesting case is Germany where the regulator, BNetzA, decided to reserve 100 MHz, between 3700 and 3800 MHz, to industrial groups. The assignment process was launched in November 2019.

Will the C-band boost the development of 5G services?

The variety of license obligations aimed at boosting 5G network deployment and service provision and ensuring a specific QoS level show that national regulators are aware of the potential of the C-band for the development of 5G services. Every country is eager to make the most out of 5G to boost domestic economic and social development.

Who is the most important buyer of 5G base station equipment?

In short, CMCC is the most important buyer of base station equipment in the world. It is therefore highly significant that in its latest round of tenders for 5G base station equipment in the 2.6 GHz frequency range, China Mobile decided to award 16.33% of the order volume to Ericsson (Sweden) and 10.28% to Nokia (Finland).

Tender For Supply and installation of automated systems for upgrading the remote management of sites external to the wastewater treatment plant. Refer Document.

Comparison of the number of 5G base stations in the European Union (EU) and selected countries worldwide in 2024 [Graph], European 5G Observatory, June 30, 2024.
