Understanding the role of base stations is crucial for comprehending how modern wireless networks function, particularly with the advent of 5G and the existing LTE technology.

Key for connecting base stations into a network, this system ensures smooth communication. It becomes a top priority during power outages to maintain data flow.

5G base stations are the critical infrastructure that enables the seamless transmission of data between devices and the core network.

DOES definition: a plural of doe. See examples of does used in a sentence.

does in British English (dʒz) verb (used with a singular noun or the pronouns he, she, or it) a form of the present tense (indicative mood) of do 1
