What are the new EU power supply regulations?

Expanded Scope: The new regulations will apply not only to external power supplies but also to battery chargers, wireless charging pads, and USB-C cables sold in the EU. Increased Power Capabilities: The limitation on product power of 250W will be lifted, allowing for more powerful devices to be designed, aligning with sustainability goals.

What is the new EU Battery regulation?

The new EU Battery Regulation is primarily a response to the mass-market adoption of EVs, however, it also covers industrial stationary applications, such as mission-critical power systems.

What do EU draft regulations mean for EPs and USB-C cables?

EU draft regulations aim to enhance energy efficiency and sustainability for EPS and USB-C cables, affecting design, labeling, and durability standards by 2025.

What are the new ecodesign requirements for external power supplies?

The draft Commission Regulation proposes new ecodesign requirements for External Power Supplies (EPS), Battery Chargers for portable batteries, Wireless Chargers, Wireless Charging Pads, and USB Type-C cables.

1. Extending the scope - Wireless Chargers and Battery Chargers for portable batteries, as per Regulation (EU) 2023/1542. 2.

The Ecodesign regulation (EU) 2019 /1782 which is in application since April 2020, covers external power supplies with an output power of maximum ...

We enable a mobile, uninterruptible power supply for systems with high energy requirements, even in fully electric vehicles such as refrigerated ...

As an EU Regulation, it applies automatically to all member states without implementation in national laws. The new regulations address aspects such as carbon ...

This article explores how EU Uninterruptible Power Supply Vehicle BESS solutions address energy reliability

challenges while supporting sustainable transportation infrastructure.

Overview of UPS product regulations, safety standards, EMC, performance, and environmental requirements in the European Union.

As an EU Regulation, it applies automatically to all member states without implementation in national laws. The new regulations ...

The draft Commission Regulation proposes new ecodesign requirements for External Power Supplies (EPS), Battery Chargers for portable batteries, Wireless Chargers, Wireless Charging ...

We enable a mobile, uninterruptible power supply for systems with high energy requirements, even in fully electric vehicles such as refrigerated lorries.

EU draft regulations aim to enhance energy efficiency and sustainability for EPS and USB-C cables, affecting design, labeling, and durability standards by 2025.

The Ecodesign regulation (EU) 2019 /1782 which is in application since April 2020, covers external power supplies with an output power of maximum 250 W, which are intended to work ...

The Uninterruptible Power Supply (UPS) design falls under the category of Low Voltage (LV), Electromagnetic Compatibility (EMC) Directives, and that of other regulations. ...

The Commission must set these for products which are widely sold and traded in the EU and have a significant environmental impact. For more information see: External power supplies -- ...
