This report summarises IRENA analysis to identify favourable zones in El Salvador for utility-scale solar PV and onshore wind projects, and their associated techno-economic parameters.

The president of El Salvador's transmission company Etesal, Edwin Nunez, announced plans to install energy storage systems at substations managed by the company.

This study finds that a significant portion of El Salvador's land area is highly suitable for solar PV and onshore wind development. However, the most promising zones to prioritise in the ...

As countries around the world shift towards renewable energy sources, El Salvador is gradually increasing its solar and wind energy capacity. While the progress is ...

This report summarises IRENA analysis to identify favourable zones in El Salvador for utility-scale solar PV and onshore wind projects, and their ...

Malawi Wind and Solar Energy Storage Power Station Located in the Dedza district of Malawi near the town of Golomoti, the 20MWac solar PV and 5MW/10MWh energy storage project is ...

For 27 years, AES El Salvador has contributed to the country's development, strengthening our leadership as a benchmark in the national and regional electricity sector.

In renewable energy, Li-ion batteries allow efficient storage to manage load variations, making them ideal for small to medium-sized solar and wind energy storage facilities.

AES' Meanguera del Golfo solar plant--the first of its kind in Latin America--relies on enhanced
