How much does a wind turbine cost?

Onshore turbines generally have capacities between 2 to 4 megawatts, while larger offshore turbines can cost significantly more, often exceeding \$100 million. On WeatherGuard Wind, it's noted that commercial wind turbines typically cost between \$2.6 million and \$4 million each, with an average cost of about \$1.3 million per megawatt.

How much does a 12 MW wind turbine cost?

The most powerful 12 MW wind turbine costs up to \$400 million to manufacture and install. Costs for utility-scale wind turbines can be broken down into three categories: manufacturing, transport and installation, and operations and maintenance. Researchers are constantly working to drive down the costs.

How much does a wind turbine cost in 2024?

In 2024, the average capital cost for onshore turbines ranges between \$900 and \$1,200 per kilowatt (kW), while offshore turbines can cost between \$2,000 and \$3,000 per kW due to their complexity and installation challenges. Installation costs are influenced by site-specific conditions such as terrain, grid connection, and logistical considerations.

How much does wind energy installation cost?

This cost can vary widely based on several factors: While it's challenging to provide an exact figure due to these variables, installation costs typically range from 20% to 30% of the total project cost. For the most accurate estimate, it's advisable to consult with wind energy professionals who can assess your specific situation.
