In this document, the Environmental Protection Agency (EPA) is proposing five separate actions under section 111 of the Clean Air Act (CAA) addressing greenhouse gas ...

The rules target power plant air emissions, including greenhouse gases (GHGs) and air toxics, as well as wastewater and coal ash releases. EPA says that its intention in issuing the four rules ...

We report below a multimodel analysis of the EPA power plant rules that can provide timely information, including for other countries and states, on emissions impacts, policy design for ...

By integrating the complex rules into an advanced capacity expansion model, we find that the EPA rules can cost-effectively reduce CO₂ emissions by encouraging coal ...

Aiming to address this, the Environmental Protection Agency (EPA) issued finalized carbon pollution standards in May 2024, which would regulate carbon dioxide (CO₂) emissions from ...

For new gas-fired power plants, EPA abandoned performance standards based on hydrogen co-firing. EPA had also proposed including emission guidelines for existing, high ...

We report below a multimodel analysis of the EPA power plant rules that can provide timely information, including for other countries and states, on emissions impacts, ...

EPA's final Clean Air Act standards for existing coal-fired and new natural gas-fired power plants limit the amount of carbon pollution covered sources can emit, based on proven ...

On April 25, EPA issued final carbon pollution standards for power plants that will protect public health and
