Why is energy in Equatorial Guinea declining?

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment and lack of new discoveries. In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data.

How much energy does Equatorial Guinea use?

Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes. As of 2012, renewable energy accounted for 29.2% of the final energy mix.

How much oil does Equatorial Guinea produce a day?

In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data. Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes.

Why is oil production declining in Equatorial Guinea?

However, production has been declining in recent years due to under-investment and lack of new discoveries. In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data. Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe).

6Wresearch actively monitors the Equatorial Guinea Energy Storage Systems Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, ...

The Equatorial Guinea energy market data since 1990 and up to 2022 is included in the Excel file accompanying the Equatorial Guinea country ...

Equatorial Guinea Compressed Air Energy Storage Market is expected to grow during 2025-2031

Equatorial Guinea energy storage power station revenue
