Are undocumented communication devices hidden in Chinese-made solar inverters?

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

Are 'rogue' communication devices hidden inside solar power inverters?

In a discovery that has sent shockwaves through the cybersecurity community, U.S. energy officials have found undocumented "rogue" communication devices hidden inside solar power inverters imported from China.

Are Chinese solar inverters Rogue?

The discovery of rogue communication devices in Chinese-made solar inverters represents a clear and present danger to global energy security.

Are Chinese solar inverters a threat to Europe?

"But now the critical mass is much larger." By some estimates, more than 200 gigawatts of solar capacity in Europe is linked to Chinese-made inverters. That level of dependence has become a growing concern among European intelligence agencies. In November, Lithuania enacted laws banning remote Chinese access to large-scale renewable installations.

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar ...

Over the past nine months, forensic security teams have logged multiple brands of Chinese solar inverters containing hidden wireless communication equipment. Investigators ...

A November 2024 incident, where inverters in the U.S. and elsewhere were remotely disabled from China, underscored the risks of foreign control over local power ...

U.S. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after ...

U.S. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after discovering undocumented 4G/LTE modules and other ...

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers.

Experts uncover rogue devices in Chinese-made inverters and batteries, prompting U.S. and EU nations to review renewable tech ...

The biggest threat to solar inverter security is the software that uses the advertised communication hardware. As demonstrated by Deye when I wrote about them in November, ...

Undocumented communication devices have been discovered inside solar inverters and batteries manufactured in China, according to two sources familiar with the matter.

Technical experts conducting detailed hardware inspections, or "teardowns," of inverters connected to U.S. power grids revealed the presence of unauthorized communication ...

The undisclosed devices were reportedly found during a routine disassembly of Chinese-made power inverters, which serve to ...

Experts uncover rogue devices in Chinese-made inverters and batteries, prompting U.S. and EU nations to review renewable tech security.
