-----

Guyana's landmark Gas-to-Energy project reached a critical milestone with the arrival of a 30-MW backup battery energy storage system (BESS) at Georgetown's John ...

The system arrived at the John Fernandes Wharf in Georgetown in 22 containers and will serve as the facility's emergency support in the event of turbine failure. It comprises ...

LNDCH4 Guyana on Friday announced the arrival of the Backup Battery Storage System (BESS), a critical part of the power plant's emergency support system, that is ...

The road ahead isn't without potholes--battery recycling infrastructure needs development, and cybersecurity for smart systems remains crucial. But with 47% projected market growth ...

The BESS forms a critical part of the power plant's emergency support system and is engineered to ensure uninterrupted energy delivery ...

Designed to respond instantaneously, BESS provides "critical" backup power to protect the integrity of the electrical grid and maintain operational stability in the event of ...

Guyana's project isn't just about storing energy--it's about harnessing chaos. With 87% forest cover and rivers that behave like moody teenagers (unpredictable and full of ...

Advanced energy management systems now optimize power distribution and load management across outdoor power systems, increasing operational efficiency by 40% compared to ...

The BESS forms a critical part of the power plant's emergency support system and is engineered to ensure

uninterrupted energy delivery in the event of turbine failure. The ...

In this study, a novel energy management strategy (EMS) with two degrees of freedom is proposed for hybrid energy storage systems consisting of supercapacitor (SC) and battery in ...
