Guyana's landmark Gas-to-Energy project reached a critical milestone with the arrival of a 30-MW backup battery energy storage system (BESS) at Georgetown's John Fernandes Wharf, ...

The Guyana Solar Power and Energy Storage Project, jointly constructed by China Railway International Group under China Railway Group Limited, is the largest solar ...

Despite setbacks, LNDCH4 reports construction continues around the clock at international standards. The project represents a transformational shift for Guyana, which ...

Guyana has unveiled a new 0.65 MW grid-forming solar project, paired with a 1,500 kWh battery energy storage system (BESS) ...

Guyana Power and Light (GPL) is advancing clean energy with new solar PV projects and battery storage, set to benefit 70,000 people and reduce costs.

Spread across 13 acres, the solar farm combines 5 MW of photovoltaic capacity with battery storage technology capable of retaining surplus energy during daylight hours and ...

Spanning 13 acres, the advanced facility combines solar generation and energy storage to stabilize power supply on the Essequibo Coast. It captures excess solar energy ...

With a total capacity of 30 megawatts, the system was shipped in 22 containers which comprised battery racks, six inverters, auxiliary transformers and a fully integrated ...

Guyana has unveiled a new 0.65 MW grid-forming solar project, paired with a 1,500 kWh battery energy storage system (BESS) and a 13.8 kV transmission line.

But here's the kicker: Guyana's planning something bigger. With the Energy Storage Battery Forum 2025 just 18 months away, this small South American nation is positioning itself as the ...

The system arrived at the John Fernandes Wharf in Georgetown in 22 containers and will serve as the facility's emergency support in the event of turbine failure. It comprises ...
