Support CleanTechnica's work through a Substack subscription or on Stripe. Massachusetts has to reach 5 gigawatts (GW) of energy storage capacity by 2030, per ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. battery storage already ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

The report also notes that the US commissioned 11.9GW of battery energy storage system (BESS) capacity last year, a 55% increase from the previous year, the fifth consecutive ...

Electrical Energy Storage (EES) systems store electricity and convert it back to electrical energy when needed. 1 Batteries are one of the most common forms of electrical energy storage.

The U.S. energy storage market set a record for quarterly growth in Q2 2025, with 5.6 gigawatts (GW) of installations, according to ...

energy storage market set a record for quarterly growth in Q2 2025, with 5.6 gigawatts (GW) of installations, according to the latest U.S. Energy Storage Monitor report ...

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China ...

The report also notes that the US commissioned 11.9GW of battery energy storage system (BESS) capacity last year, a 55% increase ...

Short-term headwinds will drive modest contractions in 2026-2027, yet Wood Mackenzie's latest forecast projects nearly 93 GW of new storage through 2029, cementing ...

These innovative CO2 batteries from Energy Dome promise long-duration energy storage for the grid, and reliable 24/7 clean power for data centers.

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil.
