How many 5G base stations does South Korea have?

In the report, South Korea ranked first among 29 countries, including non-OECD members such as China and the European Union, in "5G base station deployment." The country recorded 593 5G base stations per 100,000 inhabitants, significantly surpassing Lithuania (328) and Finland (251).

How many 5G base stations are there per 100,000 people?

The country recorded 593 5G base stations per 100,000 inhabitants, significantly surpassing Lithuania (328) and Finland (251). The OECD average stood at just 100 base stations per 100,000 inhabitants. In the category of "number of 5G connections per 100 inhabitants," the United States led with 68.4 connections, followed by South Korea with 63.

Does South Korea have 5G?

Earlier this year, the Korean regulator, the Ministry of Science and ICT (MSIT) announced that South Korea had attained nationwide 5G coverage. MSIT allocated wide bands to each of the three mobile operators, KT, SK Telecom and LG U+, with the former two receiving 100 MHz, and the latter initially receiving 80 MHz.

Which South Korean mobile providers use a 5G non-standalone network?

Among South Korean mobile providers, both LG U+ and SK Telecom use a 5G non-standalone (NSA) network configuration, where voice is delivered via VoLTE (using the 4G network), while KT employs a 5G standalone (5G SA) network, where voice is carried over the 5G new radio (VoNR).
