What is the capacity of a container power generator?

Container power generators are available with a rated capacity of 30 kVA to 3000 kVA. Depending on the asked performance and execution, the generators are mounted in soundproof, weatherproof ISO container with a length of 10', 20' or 40'.

What size container do I need for my Generator?

Depending on the asked performance and execution, the generators are mounted in soundproof, weatherproof ISO container with a length of 10', 20' or 40'. If desired, particularly compact container units can be delivered depending on the required power, also in intermediate sizes for 12', 25' or 30' foot container versions.

How many generators can be used in a container genset?

The container gensets can be powered by engines of following manufacturers: The container built-in control panels are based on the intended use, e.g. manual/stand alone operation, emergency/standby or parallel operation. In parallel mode (GenSet-GenSet), up to 32 generators can be used as 'Power-Plant'.

What is a containerized generator set?

The durable and robust Containerized Series generator sets are ideally suited for independent power producer (IPP), mining, oil and gas, or any project where harsh conditions, challenging environments and the demand for reliable, continuous remote power exist.

For a very broad average value for all container types, ambient conditions and cargo types, the value 3.6 kW/TEU can be used. A 20" container tends to be closer to 4 kW and a 40" container ...

The WDG825CC container generator set has a 750 kVA (600 kW) power rating and supports silent and open-frame designs to meet a wide range ...

For our office shipping containers, you may use a portable generator between 3 kW and 10 kW or a trailer-mounted generator between 10 kW and 30 kW. You shouldn't operate portable office ...
