How much does an off grid solar system cost in Australia?

But before you take the leap, understanding the Off Grid Solar System Cost is crucial. The average Off Grid Solar System Cost in Australia ranges between \$25,000 and \$60,000 in 2025, depending on household size and energy requirements. Here's a quick cost breakdown:

How much does an off-grid solar system cost?

However, off-grid solar systems are generally more expensive than grid-tied systems. How much does an off-grid solar system cost in 2025? According to our Energy Matters team, the average cost of an off-grid solar system for a two--to three-person home is around \$20,000--\$35,000. The greatest expense is the battery.

Are off-grid solar systems a viable option in Australia?

As the world continues prioritising sustainability and renewable energy sources, off-grid solar systems have emerged as an attractive option for homeowners and businesses in Australia. These systems allow consumers to independently generate clean, renewable energy, reducing reliance on traditional fossil fuels and power grid networks.

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects--all while reducing carbon footprint and cutting energy costs.

Find out the real Off Grid Solar System Cost in Australia. See what affects pricing and how to maximise value in 2025.

Containerised off-grid power systems designed and built in Australia for farms, mining, remote resorts and communities. Reliable, scalable, pre-wired and factory-tested.
