How much does a container home cost?

Most container homes cost between \$150 and \$350 per square foot (about the same as the cost of a standard ADU). Ordering a used shipping container is usually less expensive and is more sustainable than buying a brand-new one. Containers come in standard sizes so they can be easily transported on roads and cargo ships.

How much does a multi-unit container home cost?

For a larger modular multi-unit container home, measuring roughly 1,000 to 1,600 square feet, the budget can reach \$150,000 to \$300,000 or more depending on finishes, customization, and whether you incorporate off-grid systems like solar or rainwater catchment.

What is a container home?

A traditional container home repurposes steel shipping containers to construct a durable home. You can think of the containers as the bones of the house, requiring more materials to build a home that meets local building requirements. Modular homes are similar to mobile homes.

Should you buy a shipping container home?

Shipping container homes are a great option for homeowners who don't need a lot of space or don't want to be tied down physically or financially by a more traditional and costly house. Before you start a new build, here's everything to consider as you budget for all the shipping container home costs you'll encounter during your project.
