Huawei is the latest in a growing list of automakers and tech companies that are exploring the possible benefits of fitting an EV with solid-state batteries, with the likes of BMW,...

The patent, presumed to be filed in China, details Huawei's method of enhancing battery performance by doping sulfide solid ...

Huawei has filed a patent detailing a sulfide-based solid-state battery design with energy densities between 180 and 225 Wh/lb, roughly two to three times higher than today's ...

Chinese tech giant Huawei has filed a patent for a next-generation solid-state electric vehicle (EV) battery that claims to offer an unprecedented driving range of over 3,000 ...

Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra ...

By filing a new patent for a high-density battery design, the company is entering a race already crowded with big names like BMW, Volkswagen, Mercedes-Benz, BYD, and ...

By filing a new patent for a high-density battery design, the company is entering a race already crowded with big names like BMW, ...

Whether Huawei's design proves manufacturable or merely monetised via royalties, it sharpens industry focus on dry solid-state as the chemistry most likely to leapfrog ...
