Why did Huawei join Solarpower Europe?

Huawei's market power recently allowed it to make its way back into SolarPower Europe, the solar sector's most prominent lobby association in Brussels, despite an ongoing Belgian bribery investigation focused on the firm's lobbying activities in Brussels that saw it banned from meeting with European Commission and Parliament officials.

Why are Huawei's solar panels being banned in China?

Such restrictions would target Huawei first and foremost, as the dominant Chinese supplier of critical parts of these systems. The fears center around solar panel inverters, a piece of technology that turns solar panels' electricity into current that flows into the grid.

Does Huawei have a partner ecosystem?

Regarding partner ecosystems, Huawei has announced SHAPE 2.0 for enhanced collaboration with local partners in Europe. SHAPE 2.0 is an upgraded version of the SHAPE partnership framework that was released by the company last year.

Could Huawei turn the lights off?

Now Europe is growing worried that Huawei could turn the lights off. The Chinese tech giant is at the heart of a brewing storm over the security of Europe's energy grids. Lawmakers are writing to the European Commission to urge it to "restrict high-risk vendors" from solar energy systems, in a letter seen by POLITICO.

At HUAWEI CONNECT 2025 in Madrid, we discovered complete and integrated solutions for photovoltaic systems -- from inverters and batteries to smart monitoring.
