The statistics for operational and planned projects are updated biannually, while the list of projects under construction is updated as new information about investment decisions becomes available.

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of ...

China-headquartered electronics firm Huawei has secured a supply agreement to provide a 4.5GWh battery energy storage system (BESS) for the Meralco Terra Solar project in the ...

Tampere University Photovoltaic (PV) Power Research Plant, located on the rooftop of Sahkotalo building at Hervanta Campus, consists of 69 PV modules with irradiance and temperature ...

This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025.

The project focuses on establishing the groundwork for perovskite-silicon tandem solar cell research, which holds the key to surpassing the ...

Summary: Discover how Tampere, Finland, is leading the charge in lithium battery energy storage systems (ESS). This article explores cutting-edge applications, local industry trends, and ...

Discover how Tampere, Finland's third-largest city, is leveraging photovoltaic systems and advanced energy storage to combat climate challenges. This article explores practical ...

It provides smart PV solutions for residential, commercial, industrial, utility scale, energy storage systems, and
