supplies or input power source fails. It not only acts as an ...

1. Introduction When high levels of power quality and dependability are required, UPS is a crucial component of the electrical infrastructure.

The paper presents a practical application of the theory of differential equation with discontinuous right hand side proposed by Filippov for an uninterruptible power supply.

An Uninterruptible Power Supply (UPS) ensures continuity of the power supply regardless of fluctuations or interruptions in the utility supply. This is an essential requirement for critical ...
