How much does solar attic fan installation cost?

If you hire a pro, solar attic fan installation costs between \$300 and \$1,000 and generally only takes a couple of hours. However, there are a few reasons why it's better to let a local attic fan installer handle this job.

How do you install a solar attic fan?

Use a tape measure to find the distance between the two rafters where you'll install the fan, then mark the center point with a marker. With a hammer or drill, drive a nail or screw through that center point so that you can easily see it when you're on the roof. If your solar attic fan came with a circular template, grab it and head outside.

Should I install an airtight attic floor & solar fan?

An airtight attic floor + solar fan is an awesome combo for efficiency; a leaky attic floor + fan could have mixed results. So, don't skip the prep work: seal, insulate, then ventilate. ? Using Existing Vent vs. Cutting a New Hole: How you physically install the fan depends on your roof's situation.

Is a solar attic fan a replacement for air conditioning?

No, it's not a replacement for air conditioning - but it assists your AC. Think of a solar attic fan as a passive helper to reduce heat gain, not an active cooler for your living space. It can dramatically lower attic temperatures, which in turn lessens the heat that sneaks into your home. This means your air conditioner has a lighter load.
