Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

What is the main power source in Latvia?

Hydro is an important power source in Latvia, Kegums Hydroelectric Power Station is the oldest hydro power station in the country, built in 1940. It was agreed in 2018 that Estonia, Latvia and Lithuania would connect to the European Union's electricity system and desynchronize from the Russian BRELL power system by February 2025.

Who is responsible for the energy transition in Latvia?

Local authorities are responsible for municipal energy supply and renewable energy projects, with Latvia's energy transition guided by the National Energy and Climate Plan and the Energy Strategy 2050.

How much energy does Latvia use?

Primary energy use in Latvia was 49 TWh, or 22 TWh per million persons in 2009. In 2018, electricity consumption per capita was 3731 kWh. Latvia has adopted the EU target to produce 50% of its energy from renewable sources by 2030. The 2021-30 plan set a target of reducing greenhouse gas emissions by 65% compared to 1990.

This system, which was connected to the Latvian electricity transmission grid, contributed significantly to energy security and stability, ...

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a ...

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 ...

Explore innovative shipping container energy storage systems for sustainable, off-grid power solutions. Harness renewable energy ...

Latvia state-owned utility and power generation firm Latvenergo intends to deploy 250MW/500MWh of BESS in the next five ...

The study presents different varieties of hydrogen tanks that are used for the storage and transportation of hydrogen gas.

Latvia state-owned utility and power generation firm Latvenergo intends to deploy 250MW/500MWh of BESS in the next five years.

This system, which was connected to the Latvian electricity transmission grid, contributed significantly to energy security and stability, especially ahead of the planned ...

This article will explore the differences between folding photovoltaic panel shipping containers and traditional energy storage methods, as well as the application of home solar ...

In 2022 a wind farm is in the initial planning stage to be located in the Gulf of Riga, Latvia having rejected the idea of working with Estonia on a nearby project, the new plan is expected to ...

Explore innovative shipping container energy storage systems for sustainable, off-grid power solutions. Harness renewable energy storage effectively.

Their goal is to contribute significantly to the Green Energy Revolution by providing these cutting-edge solutions to help mitigate the reliance on ...
