-----

This study evaluates the feasibility and performance of a solar-assisted absorption cooling system designed for the climatic conditions of three major Libyan cities: Tripoli, Benghazi, and Misrata.

Our technologies range from solar air conditioning to power-efficient energy storage systems (BESS) to solar air conditioning technologies. Explore and discover more.

The aim of this study is the evaluation of the economic and technical viability for the installation of a solar air conditioning system based on parabolic solar concentrators and ...

Abstract- The aim of this study is the evaluation of the economic and technical viability for the installation of a solar air conditioning system based on parabolic solar concentrators and ...

The aim of this study is the evaluation of the economic and technical viability for the installation of a solar air conditioning system ...

**ABSTRACT:** In this paper, the principles of the operation of an adsorption cooling circuit and its operating points are analyzed through both a thermodynamic analysis and with mathematical ...

This is an open access article distributed under the Creative Commons Attribution License, which permits unrestricted use, distribution, and reproduction in any medium, provided the original ...

Though the company is considered as a limited joint-stock company, it is proud to be able to supply all ventilation and central air conditioning systems in the world with the latest ...

Discover Libya air conditioners with Wi-Fi control, R410a refrigerant, and 2-year warranty. Ideal for home or hotel use.

Artificial Intelligence formulated this projection for compatibility purposes from the original article published at Global Journals. However, this technology is currently in beta.

Though the company is considered as a limited joint-stock company, it is proud to be able to supply all ventilation and central air conditioning ...

The aim of this study is the evaluation of the economic and technical viability for the installation of a solar air conditioning system based on parabolic solar concentrators and adsorption ...
