---

Lisbon's iconic yellow trams zipping through streets powered entirely by stored solar energy. While we're not quite there yet, the Lisbon Energy Storage Project Bidding process for ...

The 48 battery containers planned at the project, which Hyperion submitted to the DGEG in 2019, would each contain 5,015 kWh ...

That's the vision behind Lisbon's groundbreaking energy storage plant, now operational and setting benchmarks for renewable integration. This facility isn't just about storing power--it's ...

Discover how Lisbon's cutting-edge Battery Energy Storage System (BESS) is reshaping Europe's renewable energy landscape - and why industry leaders call it a "game-changer".

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Two solar-plus-storage projects are among five planned renewable energy sites whose details have been published for public consultation on the Portuguese Environment Agency's ...

Investors are shifting from a race to install ever-larger solar fields toward a more nuanced goal: pairing panels and turbines with industrial-scale batteries so the lights stay on ...

The 48 battery containers planned at the project, which Hyperion submitted to the DGEG in 2019, would each contain 5,015 kWh of the same Sungrow products. The developer ...

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play ...
