In this article, an energy constrained unmanned aerial vehicle (UAV)-aided mobile edge-cloud continuum framework is introduced, where the offloaded tasks from ground IoT devices can be ...

Electric vertical take-off and landing (eVTOL) aircraft have gained considerable interest for their potential to transform public services and meet environmental objectives. Designing an ...

Developed in partnership with Shenzhen Qihay, a technology leader in intelligent vehicles and drone logistics, this achievement ...

Developed in partnership with Shenzhen Qihay, a technology leader in intelligent vehicles and drone logistics, this achievement demonstrates the viability of grid-forming ESS ...

This article specifically concentrates on UAV platforms powered by batteries, incorporating innovative technologies, like in-flight ...

In this project, we propose to investigate the development of a battery-free UAV that can survive in the air and sustain long-term missions by harvesting solar energy, eliminating the need for...

This article specifically concentrates on UAV platforms powered by batteries, incorporating innovative technologies, like in-flight recharging via laser beams and tethering.

In order for electrical energy to be used efficiently, it must be stored. This article reviews energy storage technologies used in aviation, ...

Mobile Energy Storage Containerized Automated Type for Unmanned Aerial Vehicle UAV Stations

Source: <https://aitesigns.co.za/Tue-08-Dec-2020-11907.html>

Website: <https://aitesigns.co.za>

The contents of this study focused on solving the energy storage problem through research, experiment, and simulation based testing of the application of hybrid energy storage ...

The embodiments herein provide for a mobile micro-grid (MMG) system that provides a containerized platform for supporting unmanned aerial vehicle (UAV) operations ...

This study fills a critical gap by providing a holistic analysis of renewable energy integration in UAVs and proposing innovative approaches to optimize endurance, efficiency, ...

The system includes one or more shelves attached to a holding structure, the one or more shelves being configured to support one or more unmanned aerial vehicles (UAVs), the one or ...
