Is battery storage a key technology for Mozambique's future?

Globeleq sees battery storage as a key technology for Mozambique's future. Storage costs are expected to continue decreasing, so those systems will become more competitive and will be able to contribute more.

When did Globeleq & Mozambique launch a solar power plant?

Our solar power plant in Cuamba was inaugurated in September of 2023. It marked another milestone for Globeleq and Mozambique, as it was the first IPP to integrate a utility-scale energy storage system.

Should Mozambique export electricity?

One of the big challenges of Mozambique is its size and shape, which make the transportation of electrons across the country quite expensive. Exporting electricity would bring foreign currency that can support investments in domestic transmission and distribution infrastructure.

Why should Mozambique be a regional power supplier?

First, to ensure that Mozambique has reliable and cost-effective power generation capable of meeting its 2030 electrification goals. Second, to establish Mozambique as a regional power supplier of choice. South Africa has a critical shortage of electricity, and Zambia and Zimbabwe also require power.

As we approach Q2 2025, Mozambique's draft National Storage Strategy aims to triple grid-connected storage capacity while establishing local battery assembly plants.

Powering Progress: Mozambique's Energy Storage Industrial Park Revolution

Discover how Mozambique is leveraging cutting-edge energy storage solutions to stabilize its grid and attract foreign investment. Explore market opportunities, technical innovations, and the ...

In Mozambique, various energy storage technologies are employed to enhance grid reliability and facilitate renewable energy integration. The most prominent technologies include ...

Let's cut to the chase--Mozambique's latest joint energy storage project bidding isn't just another

infrastructure tender. With global energy storage now a \$33 billion industry ...

French energy firm TotalEnergies (TTEF.PA) plans to restart its long-delayed \$20 billion Mozambique liquefied natural gas (LNG) project in the first quarter of next year, two sources ...

Explore market opportunities, technical innovations, and the Sofala Province may have a new industrial park by Jun 19, The initiative is called Mozambique Green Industrial Park (Parque ...

Samir Sale, country and business development director of Globeleq, talks to The Energy Year about fast-tracking renewables ...

Samir Sale, country and business development director of Globeleq, talks to The Energy Year about fast-tracking renewables projects in Mozambique and the potential of solar ...

In Mozambique, various energy storage technologies are employed to enhance grid reliability and facilitate renewable energy ...

It aims to leverage Mozambique abundant energy resources - including hydropower, solar, wind, biomass, and some of the world's largest natural gas reserves - to ...

Spanning approximately 30,000 hectares across Dondo and Muanza districts, the Green Energy Mozambique Industrial Park is designed to become one of Africa's largest green industrial and ...
