The project will be delivered in stages, with initial construction expected to begin in late 2026 and full buildout of solar and battery facilities planned for 2027 and 2028. Officials at ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

The lithium battery industry has recently seen a surge of activity as leading enterprises such as CATL, Gotion High-Tech, and Capchem intensify their investments. These ...

We are the leading developer of community-scale battery energy storage systems (BESS) in the New York City metropolitan area.

Partnered to develop a 100 MW/400 MWh lithium iron phosphate battery energy storage system in Weld County, Colorado. This project, Platte River's first large-scale battery storage ...

Next-level energy storage systems are beginning to supplement the familiar lithium-ion battery arrays, providing more space to store wind and solar energy for longer ...

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are shaping the future grid.

To that end, OE today announced several exciting developments including new funding opportunities for energy storage innovations and the upcoming dedication of a game ...

Now two years into this controversial endeavor, more than a dozen energy storage sites are currently in the
