Who is Rongke new energy? Rongke New Energy is a leading professional battery energy storage system manufacturer. Our cutting-edge technology enables businesses and homes to control ...

This research presents a novel battery cell screening and prognosing methodology based on neurocomputing-based multiday-ahead time-series forecasting for predictive ...

As an essential component of the new energy vehicle battery, current collectors affect the performance of battery and are crucial to the safety of passengers. The significant differences ...

New Energy Battery X-Ray Intelligent Detection Equipment combines high-resolution X-ray imaging with artificial intelligence to inspect batteries during various stages of ...

This study compared two nondestructive testing methods, SAM and CT, for the detection and 3D localization of defects in battery cells. It is important to detect such defects ...

This paper comprehensively reviews the CT detection technology to ensure the overall structure of the battery on the basis of its internal materials, cells, battery modules and ...

Through 2D/2.5D/3D imaging technologies, combined with independently developed AI software and Focusight's new energy battery cell inspection large model, it achieves six-sided ...

This study compared two nondestructive testing methods, SAM and CT, for the detection and 3D localization of defects in battery cells. It ...

In this article, a new screening approach using three-stage battery cell anomaly detection is proposed. This approach more precisely quantifies the relative deterioration of battery ...

With the rapid growth of new energy and AI applications, battery cell quality inspection has become one of the key technologies affecting industry competitiveness.

With the rapid growth of new energy and AI applications, battery cell quality inspection has become one of the key technologies ...

Electric vehicle (EV) battery producers utilize X-ray inspection to verify internal cell integrity before assembly. Consumer electronics manufacturers employ these systems to ...
