We are a Danish solar energy company headquartered in Copenhagen. We develop, construct, and operate utility-scale solar parks across Europe on our mission to make everyone benefit ...

During the recent surge in solar PV installations, the Nordic countries - Sweden, Norway, Finland, and Denmark - have increasingly embraced solar PV technology, defying their northern ...

The Sweden Solar System is the world's largest permanent scale model of the Solar System. The Sun is represented by Avicii Arena in Stockholm (still known by most as Globen), the largest hemispherical building in the world. The inner planets can also be found in Stockholm but the outer planets are situated northward in other cities along the Baltic Sea. The system was started by Nils ...

Discover the engineering needed for solar modules in Nordic climates. Our guide covers designing for heavy snow load, low light, and bifacial technology.

Denmark has unveiled Northern Europe's biggest solar and battery park with 200 megawatt-hours of storage for grid stability and clean power.

The Sweden Solar System is the world's largest permanent scale model of the Solar System. The Sun is represented by Avicii Arena in Stockholm (still known by most as Globen), the largest ...

Learn how Nordic operators and solar developers are adjusting to tighter grid conditions and how policy and design decisions are keeping projects on track.

Discover the Nordic grid system's intricacies and seize solar prospects across Norway, Sweden, Denmark, and Finland in this comprehensive guide. In the ever-evolving ...

The share of intermittent renewable energy sources --like wind and solar--continues to grow across the Nordic region. While this transformation supports our ...

Get to know all about the amazing evolution of solar energy in the Nordic Region and the efforts of Greenlight Group.

Regarding the non-technical aspects, the focus is on identifying barriers and challenges for the adoption of solar systems in relation to national and local legislation.
