---

Danish solar company Nordic Solar has launched construction works on its first battery energy storage system (BESS) project in Sweden, an 18-MWh site located in ...

Operating in 12 European countries, the solar energy company Nordic Solar is investing heavily in integrating battery storage into its portfolio of solar park projects and is ...

Battery storage systems (BESS) offer renewable energy companies, like Nordic Solar, a way to store energy from clean sources, ...

Nordic countries are rapidly deploying intermittent renewable energy sources like wind and solar power. The variable output from these sources presents challenges to grid stability, making ...

The storage of excess solar energy ensures that more renewable energy is available when there is demand, even after sunset. By increasing the ...

The Nordic region benefits from large hydro reservoirs that provide excellent and cost-effective energy storage options, which are already being efficiently utilised.

In this instalment of our Nordic power sector transition series, we explore the emerging technologies in the region's energy transformation. From advanced storage ...

With rich renewable resources and advanced storage technologies, the Nordics are positioned to become Europe's "green battery," supplying clean energy across the ...

Mikel elaborated on three quick questions about the current state and future outlook of the Nordic renewable energy market, particularly focusing on the rising interest in ...

Battery storage systems (BESS) offer renewable energy companies, like Nordic Solar, a way to store energy from clean sources, such as solar and wind energy. While these ...

The storage of excess solar energy ensures that more renewable energy is available when there is demand, even after sunset. By increasing the share of affordable solar power in the energy ...

Utility-scale solar projects in Sweden, Finland, and Denmark are flourishing, while battery storage and AI are reshaping what's possible for grid stability and long-term power ...
