How does Norway's container terminal work?

The terminal also has near dock rail connections, linking the port with inland rail hubs used for further domestic distribution. Being the main import hub of Norway, the container terminal has direct services to all key Northern European ports as well as the United Kingdom.

Does space Norway own fibre optic cables?

Space Norway owns and manages two fibre optic subsea cables that provide stable internet connectivity to Longyearbyen, the main Norwegian settlement in Svalbard. These cables also connect to the research station at Ny-Ålesund. Ny-Ålesund, located at 79° North in Spitsbergen, is the world's northernmost settlement.
