Why should you choose a hydrogen storage container?

Our hydrogen storage containers offer the highest safety levels in high-pressure storage and transportation of large volumes of hydrogen, combined with the low price of our services per kg of hydrogen. Our hydrogen, as well as CNG storage solutions, are type-approved according to EN 12245, ADR and TPED.

What makes our offshore energy storage containers unique?

Featuring sophisticated HVAC and power control systems, these containers are constructed to ensure a secure and conducive environment for both personnel and equipment. Our commitment to customization means every container is a step towards operational excellence in offshore energy storage.

Are our Hydrogen & CNG storage solutions type-approved?

Our hydrogen, as well as CNG storage solutions, are type-approved according to EN 12245, ADR and TPED. The non-toxic and non-corrosive properties of our pressure vessels for hydrogen storage benefit the lifetime of solutions by eliminating the risk of galvanic oxidization.

What is a type IV pressure vessel for hydrogen storage?

Type IV pressure vessels for hydrogen storage in robust fiber glass offer up to 70% weight reduction compared to steel skids. Safety is central to everything we do. And our CNG and biomethane transport containers are engineered to meet the highest safety standards.

As a top energy storage container manufacturer & factory, HMX Energy is your direct supplier & wholesaler for container energy storage systems. Get competitive prices on reliable BESS ...

We supply specific modules incorporating THERA (R) technology at typical refueling station pressures, from 240 bar up to 1000 bar, to ensure a reliable transport of high-pressure ...

World leading supplier of lightweight composite high-pressure cylinders and systems for storage and distribution of hydrogen.

With the COSMOS high-pressure system from heiserTEC, we offer a modular solution that is used worldwide in energy projects, research facilities, and industrial applications.

Discover the future of offshore energy storage with TLS Offshore Containers, your premier partner for intelligent pressurized containers. Tailored to the rigorous demands of offshore operations, ...

The G-Stor(R) Pro Bundle range is a high pressure gas storage solution using dependable Luxfer Type 3 cylinders. Our unique cylinder processing reduces weight, increases volume and ...

Our hydrogen storage containers offer the highest safety levels in high-pressure storage and transportation of large volumes of hydrogen, combined with the low price of our services per ...

Our energy storage containers utilize the latest advancements in battery technology, ensuring maximum efficiency and reliability. This positions us as a leader in the energy storage market, ...

Our composite ground storage vessels deliver compact, efficient, and high-capacity gas storage. Ideal for hydrogen stations, CNG facilities, and renewable energy sites.

We supply specific modules incorporating THera (R) technology at typical refueling station pressures, from 240 bar up to 1000 bar, to ensure a ...

Hydria delivers high pressure gas storage, mobile gas delivery, and gas trailers for hydrogen, CNG, RNG and specialty gas applications.
