-----

ASR's proprietary, patented system consists of a BESS (battery-electric storage system)-powered EMDI(R) railcar (a passenger locomotive) that harnesses solar energy for ...

Imagine mile-long trains with 120 or more battery cars, charging up where wind and solar power is cheap and making daily deliveries of over two gigawatt-hours of clean energy each--enough ...

SunTrain is developing freight trains equipped with lithium ...

SunTrain seamlessly stores green energy from remote solar and wind farms within customized battery containers that are transported over existing railroad networks. This links ...

SunTrain wants to use Colorado to demonstrate its batteries-on-train-cars system for transmitting renewable energy.

The company envisions one day moving 100-car-unit trains of battery storage across the U.S., connecting renewable energy sources ...

By converting battery storage into rail cars that transport clean energy from remote solar and wind farms directly to urban centers, ...

Our systems store renewable energy in 100-ton, iron-phosphate batteries integrated into railcars, which bypass the troubled electrical grid to deliver ...

By converting battery storage into rail cars that transport clean energy from remote solar and wind farms directly to urban centers, SunTrain offers a practical solution without the ...
