What type of glass is best for solar panels?

On a clear-over-clear double-glazed configuration, SNE 50 coated glass provides 48% visible light transmittance and 0.25 solar heat gain coefficient - making it suitable for projects in many regions. SunGuard SN 54 low-E coated glass strikes a balance between color neutrality and solar control - so your project can blend in or make a statement.

What is solar control glass?

Solar control glass can also have different levels of reflectivity to provide transparency or a more reflective, almost mirrored glass effect, as well as a changing appearance during the day, to meet your aesthetic needs. There are many products available to choose from.

What is a solar cell cover glass?

Our Solar Cell Cover Glasses offer a range of technical advantages when used for space or terrestrial applications such as photovoltaic systems and optical solar reflectors. Transmittance across the spectrum from UV-A to near-infrared is excellent, while low-wavelength UV radiation is effectively blocked.

Can solar control glass be colored?

Our solar control glass is applied on clear float glass and has a neutral aspect, allowing more natural, truer views through the glass. However, if you wish, solar control glass can also be colored. Our solar control coatings can be applied on tinted glass to further help mitigate glare and solar heat gain.

Get free shipping on qualified Tempered Glass Solar Tubes products or Buy Online Pick Up in Store today in the Doors & Windows Department.

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a ...

Elevate your building's efficiency with our high-quality solar control glass designed for heat reflection and UV protection. Perfect for both residential and commercial applications, our solar ...

As one of the most trusted and proven solar control, low-e glasses available, Solarban(R) glass has been and continues to be specified for countless AIA COTE (R) award-winning and LEED (R) ...

As one of the most trusted and proven solar control, low-e glasses available, Solarban(R) glass has been and continues to be specified for countless ...

Solar control glass is ideal for helping to maximize natural daylight while reflecting a high proportion of solar radiation away from the glass, contributing to keeping the indoor space ...

Elegant Design: This 40cm solar powered pole lamp features a classic style with a bronze finish, perfect for enhancing the beauty of your garden, backyard, or courtyard.

This innovative glass is designed to convert sunlight into electricity, combining the functional attributes of a building's envelope with the capability to generate clean energy.

By combining lightweight, extremely durable materials with outstanding optical transmittance, SCHOTT(R) Solar Glass ensures reliable power ...

Garden Solar Lamp 40cm Stainless Steel with Mosaic Glass 1 LED RGB 12/showbox is available in the entac range, in the Garden lamp category. view Garden Solar Lamp 40cm Stainless ...

By combining lightweight, extremely durable materials with outstanding optical transmittance, SCHOTT(R) Solar Glass ensures reliable power supply and efficient operation of photovoltaic ...

Double or triple glazing, in strips or as insulating glass made to measure, toughened or not - solar control glass from AGC Interpane meets the individual requirements for each of your projects.
