Explore our advanced solar structure manufacturing services, providing robust and reliable solutions for all your solar energy needs.

For module assembly, we develop innovative solutions characterized by modular design, high automation levels, and great process reliability. This enables our customers to achieve optimal ...

Discover what photovoltaic glass is, how it works, and how to integrate solar energy and automation into homes and businesses efficiently and sustainably.

Where other vision systems can only deliver limited results, Dr. Schenk has developed and manufactured SolarInspect, a system specialized to precisely distinguish between glass ...

The majority of today's crystalline silicon (c-Si) PV modules are manufactured in accordance with a glass-backsheet (GBS) module lay-up: 3.2-4mm glass at the front and a polymer-based...

Sunjoule has the same structure as ordinary laminated glass and can be installed wherever glass can be installed. The use of tempered glass makes Sunjoule sturdier and more efficient, even ...

The structure typically begins with two sheets of glass, often tempered or low-iron glass for enhanced light transmission and structural integrity. Between these glass layers, a transparent ...

We investigated ways to reach specific glass surface morphologies and optical behaviors using wet and dry etching, combinations of blasting and etching, and imprinting into hot glass.

For module assembly, we develop innovative solutions characterized by modular design, high automation levels, and great process reliability. This ...

A solar glass assembly configured to generate energy and including a framing assembly having a plurality of framing elements enclosing a cavity, an upper frame surface, and a lower frame...

Copper ribbons are applied, an encapsulant sheet and second sheet of glass are placed on top, and the stack is laminated to make it waterproof. Finally, a junction box is attached to the rear ...
