Do I need a solar array?

If you're running the Builder Boon (Power & Water), you don't need the Solar Array, plus you need two people to craft C4: a Computers -> Electronics person + a Chemistry -> Munitions person. Drone has a chargeup time (20 min to provide 1 hr to use it), but it's pretty great at destroying a PH or infestation

What is a residential solar array?

A typical residential array is mounted on the house, facing due south when possible, and usually on the roof. While most solar arrays are stationary, some arrays are designed to use very efficient electric motors to turn the individual panels or groups of panels to follow the sun.

What is a solar array?

A solar array is solar panel sets that are tied (connected) together. What is an Array Current? Array Current is the electrical current is generated by a photovoltaic array when exposed to sunlight. What is Array Operation Voltage?

A solar array is a series of more than one solar panel, stacked together, to simultaneously convert sunlight into electricity. Usually, these panels in array are either ...

A solar array is a system of multiple solar panels that work together to capture sunlight and generate electricity for your home. The size and ...
