Which portable solar panel is best?

If you need fast solar charging on the go, there's one panel that stands out above the rest. Bluetti's PV350 portable solar panel has a massive solar capacity of 350 watts, so it can collect more sunlight and send more electricity to your devices. It's 75% larger than my best overall pick, the Jackery SolarSaga 200.

Should you buy a portable solar panel from Best Buy?

Best Buy customers often prefer the following products when searching for portable solar panels. Portable solar panels are a great way to power your electronics while camping or hiking. They're also a great option for people who want to go green but don't want to deal with the hassle of installing solar panels on their roof.

How much do solar panels cost?

For example, you can get the 200-watt Jackery SolarSaga 200 for \$699, or \$3.50 per watt. Or, you can get the 350-watt Bluetti PV350 for \$677 (when discounted), or \$1.93 per watt. The panels we tested for this list ranged from 50 watts to 350 watts.

What are portable solar panels?

Portable solar panels are a great way to take advantage of clean, renewable energy while on the go. These panels are lightweight and easy to transport, making them perfect for camping, hiking, or any other outdoor activities. They can also be used in emergencies to provide power when there is no other source available.
